TILSATEC LIMITED, Flanshaw Lane, Wakefield, West Yorkshire, WF2 9ND, ENGLAND

“We believe every person working in the supply chain should have equality, a safe place to work, and the means to support themselves and their families, in employment free of bribery and corruption.”

Why is it relevant when choosing a PPE supplier?

Being a member of SEDEX enables our organisation to continually monitor and improve our business practices, employment methods and supply chain structure to ensure fair working conditions for the people who make our products and deliver our services to you, our customers.

With a large manufacturing facility in the UK and several manufacturing locations around the world we understand we have a duty of care to everyone involved in the production and supply of our products. We frequently audit and review our facilities and continually look for ways to reduce our impact locally using sustainable methods that keep the environment intact for future generations.

As a Sedex member we are committed to being a responsible business, sourcing responsibly, and improving ethical standards and working conditions within the supply chain.

Who Are Sedex?

Sedex is one of the world’s leading ethical trade service providers, working to improve working conditions in global supply chains. Sedex provides practical tools, services and a community network to help companies improve their responsible and sustainable business practices and source responsibly.

Using Sedex enables companies to work together to better manage their social and environmental performance and protect people working in the supply chain. Sedex has over **55,000 members** in **180 countries**, across **35 industry sectors**, including food, agriculture, financial services, clothing and apparel, packaging and chemicals.

The yarn which goes into all our products is made using **Rhino Yarn® Technology**, engineered yarn compositions which are spun and manufactured on site in the UK. This means the primary source of mechanical protection is made on site at our UK head office by our expert team of yarn technologists. With this comes the assurance of full quality control, stringent due diligence and the highest quality built in to all our products.

Operating responsibly means that as an organisation we must ensure our business practices across the supply chain limit negative impacts or have a positive impact on people and the environment no matter where we operate. This is something we must continually work at to improve working conditions for all and bring the highest quality products to market.

This is our commitment to responsible supply chain management.
